This elementary to intermediate level course will provide the student with a basic knowledge of psycholinguistics, a research domain on the intersection of linguistics, psychology and neuroscience. Three major research topics in psycholinguistics will be presented: language comprehension, language production and (first) language acquisition. In addition, we will discuss language disorders, both acquired (aphasia) and innate (developmental language disorder; dyslexia).

Lecture 1 August 19th 2019
* From sound to meaning: recognizing words and understanding sentences.

Lecture 2 August 20th 2019
* From intention to articulation: producing spoken language.

Lecture 3 August 21st 2019
* Losing language: brain damage and aphasia.

Lecture 4 August 22nd 2019
* Building the system: language acquisition in the first 4 years of life.

Lecture 5 August 23rd 2019
* Innate language difficulties: developmental language disorder and dyslexia.
